

Learning and teaching strategies

Learning and teaching is the basis of all knowledge transfer. Its complexity and the heterogeneity of different types of learning is often underestimated and still not fully explored.

Please take some time to think about what teaching and learning means to you, and how you succeed:

.....

1) How much do the following statements apply to you? Mark the most appropriate answer per statement.

1. I am able to maintain the interest of the learners.

I totally agree I rather agree I partly agree I rather disagree I totally disagree

2. I teach my learners suitable learning techniques.

I totally agree I rather agree I partly agree I rather disagree I totally disagree

3. I teach my learners how they can create optimal learning conditions for themselves (design of the learning environment, fitness, breaks, etc.).

I totally agree I rather agree I partly agree I rather disagree I totally disagree

4. I choose my teaching methods according to the learning content and let the learners work in appropriate group constellations (for example, small groups, in pairs, ...).

I totally agree I rather agree I partly agree I rather disagree I totally disagree

5. I implement measures to support individual learning processes.

I totally agree I rather agree I partly agree I rather disagree I totally disagree

6. I am able to motivate my learners to learn.

I totally agree I rather agree I partly agree I rather disagree I totally disagree

Self assessment questionnaire

2) Insert the corresponding points in the column to the right of the statements and calculate the sum in the last line (total).

4 points I totally agree	3 points I rather agree	2 points I partly agree	1 point I rather disagree	0 points I totally disagree
------------------------------------	-----------------------------------	-----------------------------------	-------------------------------------	---------------------------------------

Statement	points
1. I am able to maintain the interest of the learners.	
2. I teach my learners suitable learning techniques.	
3. I teach my learners how they can create optimal learning conditions for themselves (design of the learning environment, fitness, breaks, etc.).	
4. I choose my teaching methods according to the learning content and let the learners work in appropriate group constellations (for example, small groups, in pairs, ...).	
5. I implement measures to support individual learning processes.	
6. I am able to motivate my learners to learn.	
Total	<u> </u>

3) This is our feedback to your answers:

0 - 9 points: You are a starter!

Take one more look at your answers. What could you do as a first step to improve teaching?

Get inspired by the variety of methods on our database. You can use the search engine to specifically search for teaching methods by selecting them in the "Application fields" category.

10 - 19 points: You are well on your way to becoming a Best Performer!

Does this evaluation match with your self-assessment? Take one more look at your answers. Which areas are you already satisfied with and which areas you would like to expand?

Get inspired by the variety of methods on our database. You can use the search engine to specifically search for teaching methods by selecting them in the "Application fields" category.

Talk to colleagues and share your experiences or meet colleagues and best performers in other countries online in our online community!

20 - 24 points: Congratulation! You are highly advanced!

Apparently, you have dealt extensively with the topic and collected many valuable experience. Do you want to share this experience with other interested teachers and school leaders? Visit our Best-Performers online community and share your experience with other Best Performers!
